

AM 1110

Waterfalls Broadcasting Corporation
FM 99.3

March 9, 1987

William A. Burrows
709 Division Street
Gloucester City, NJ 08030

Dear Bill:

This letter is being sent to verify your log of WSWF AM on December 12, 1986. Enclosed please find WSWF's coverage map and bumper sticker.

To answer some of your questions, we are an AM/FM simulcast station in upstate New York. Our FM has a wattage of 3000, and AM is 1000 watts. Our AM station broadcasts from sunrise to sunset, and FM signs on at 5:30am and off at Midnite, (7am-11pm, Sundays). Our signal reaches Lake Ontario to the north, Syracuse to the east, Ithaca to the south, and the eastern suburbs of Rochester to the west. We have received signal reports from Ontario - Canada, Union - NJ, Old Greenwich - CT, Kingston - NY, and Harrisburg - PA. We are not a directional station, our studios are located at 1 Water Street in Seneca Falls and our transmitter is located about 1½ miles east of our studios on East Bayard Street.

Thank you for taking the time to let us know of your reception.

Sincerely,

Aaron T. Chuley
General Manager, 99 WSWF
